# NEWS & ALERTS FROM THE SMART GRID INTEROPERABILITY PANEL (SGIP)

## SGIP 2.0 Business Sustainment Plan Available – Webinar on Friday

A reminder that a special webinar of the Business Sustainment Plan Working Group (BSPWG) discussing Version 2 of the SGIP 2.0 Business Plan will occur this Friday. All SGIP members are encouraged to attend and comment. Scott Ungerer, BSPWG Chair, will discuss the new version and the go-forward plan. Questions will be accepted and addressed as time permits. **VIEW REVISED PLAN >>**

**DATE:** Friday, June 15
**TIME:** Noon to 1 PM Eastern
**REGISTRATION:** https://www2.gotomeeting.com/register/460709498

This meeting is OPTIONAL. Attendance will NOT be taken and your attendance does not count towards voting rights.

**UPDATE!** The BSPWG has now posted to the TWiki its responses to the individual, public comments the group received regarding the initial draft. **CLICK TO VIEW >>**

## One Month Away from SGIP's Summer Face-to-Face Meeting

The registrations are arriving daily now as SGIP Members make plans to join SGIP leaders in Portland for the Summer conference. In one month, hundreds of Smart Grid professionals from across multiple industries will be coming together to **CONNECT** with private and government leaders, **DISCOVER** new perspectives and **INSPIRE** one another as we look decisively forward to SGIP's next stage.

The agenda has been posted for both the overall sessions and the two-day Governing Board meeting. **All the details can be found here on the TWiki: https://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/Summer2012F2FMtg**.

Come be a part of it! Register today.

### Need a Room in Portland?

The Hilton Portland has graciously extended the SGIP Special Room Rates until Friday, June 15th. Make your reservation today and lock in a great deal. **RESERVE YOUR ROOM >>**

**Know someone who is doing great work within the SGIP and deserves recognition?**
**Send their name today!**

SGIP Leaders are seeking your nominations for outstanding individuals or teams for recognition at Grid-Interop. **See past award recipients and submit your nomination: http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/RecognitionAppreciation**.

## SGTCC List of ITCA Programs

*Calling All Testing and Certification Authorities* – The SGIP Testing & Certification Committee is now initiating a public list of Interoperability Testing and Certification Authorities (ITCA) that support Smart Grid standards and implement the SGTCC recommendations detailed in its Interoperability Process Reference Manual V2.0 (IPRM).

The ITCA list will be maintained on the SGTCC TWiki page ([http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/SmartGridTestingAndCertificationCommittee](http://collaborate.nist.gov/twiki-sggrid/bin/view/SmartGrid/SmartGridTestingAndCertificationCommittee)). ITCAs wishing to be included on the list must complete an [application form](application form) and provide the requested IPRM implementation information included on the form.

*Inclusion on the list is **NOT** an approval process*, but a service to the ITCAs and Smart Grid stakeholders as an information resource on available programs, along with details on the program status relative to IPRM implementation. An SGTCC review committee will validate ITCA provided information prior to list inclusion, and monitor listed Programs with respect to the Application Form information.

Questions on the ITCA program list may be directed to Kent Donohue – Working Group Chair ([r.k.donohue@ul.com](mailto:r.k.donohue@ul.com)) or Rudi Schubert – SGTCC program administrator ([rschubert@enernex.com](mailto:rschubert@enernex.com)). **VISIT TWIKI PAGE >>**

## CALL FOR PAPERS – GRID INTEROP 2012: "Driving to Grid 2020"

The sixth annual Grid-Interop Forum builds on the success of the past events by helping to enhance interoperability activities in pursuit of the smart grid.

Abstracts should address ideas and proposals to advance interoperability of smart grids as articulated by the GridWise Architecture Council (please visit [www.gridwiseac.org](http://www.gridwiseac.org)) and to implement the NIST Interoperability Roadmap. Grid-Interop offers the opportunity to discuss new and innovative ways for improving smart grid interactions, and the opportunity to participate in actions that shape the future of interoperability.

Please see the following link for more information: [http://www.grid-interop.com/2012/#cfp](http://www.grid-interop.com/2012/#cfp)
